

# ADDIE Model

- **A: Analysis**
  - Identify learning needs, define goals, and gather data to inform design decisions.
- **D: Design**
  - Outline learning objectives, structure content, and plan assessments aligned to outcomes
- **D: Development**
  - Create and assemble learning materials, tools, and media based on the design blueprint.
- **I: Implementation**
  - Deliver the training program and ensure all logistical and technological elements are in place.
- **E: Evaluation**
  - Assess the effectiveness and impact of the learning through both formative and summative methods.
